

ENVIRONMENTAL SUPPLIER DECLARATION

TYPE II ACCORDING TO DIN EN ISO 14021

This declaration is a Type II environmental supplier declaration in accordance with DIN EN ISO 14021 and represents a self-declaration without independent verification.

The statements refer exclusively to product-specific implemented characteristics and do not constitute an overall assessment of environmental impact.

MATERIAL USE AND RECYCLABILITY

- Selected products are made from recycled substrate materials, provided technical requirements allow.
- The materials used are recyclable, provided suitable collection and recycling infrastructures are available.

PRODUCT LIFESPAN AND FUNCTIONAL PROPERTIES

- Products are designed for long-term use.
- Material selection and construction aim for high mechanical stability under intended usage conditions.
- Statements regarding lifespan refer to the structural design and do not constitute a guarantee.

PRODUCTION WASTE AND DISPOSAL

- Production residues of polystyrene (PS) and polyester (PET) are collected separately.
- Materials are sent to external recycling facilities for material recovery.

EVIDENCE AND TESTING (LGA)

- LGA test reports and disposal certificates are available for selected materials, processes, or disposal paths.
- The evidence applies exclusively to the respective test subject.

FORESTRY RAW MATERIALS

- Materials Inc has been FSC®-certified since 2022 (FSC® C172111).
- Wood-based materials originate – if labeled – from responsibly managed sources according to FSC® standards.

ENERGY USE IN PRODUCTION

- Energy consumption at the production site is covered 100% by renewable energy sources.
- Additionally, electrical energy is generated via a photovoltaic system.
- The information refers exclusively to the operational production site.

ORGANIZATION AND INTERNAL PROCESSES

- On-site processes are largely managed via a data management system to reduce paper-based workflows.

CHEMICAL SAFETY AND LEGAL COMPLIANCE

- All products comply with the REACH Regulation (EC) No. 1907/2006.
- Only non-labeling-required products are placed on the market.

CE MARKING

- Products for which CE marking is required comply with the corresponding European requirements.
- The necessary Declaration of Performance documents are made available by us on the company website.
